

Value Focused Thinking: Guiding C2 System Interface Design

16 June 2004

Dr. Janet E. Miller
Cognitive Systems Engineer
Human Effectiveness Directorate
Air Force Research Laboratory

Agenda

- **Problem Statement**
- **Value-focused Thinking (VFT) Basics**
- **VFT Applied to Intel Analysts - Usability**
- **Application to C2 - Usefulness**

Problem

- **Battlefield commanders are demanding**
 - **Right information at the right time in the right way.....**
- **Interfaces can be viewed as work aids**
 - **Users' critical functions must be addressed**
- **Developers always have resource constraints**
- **Need framework to guide development**

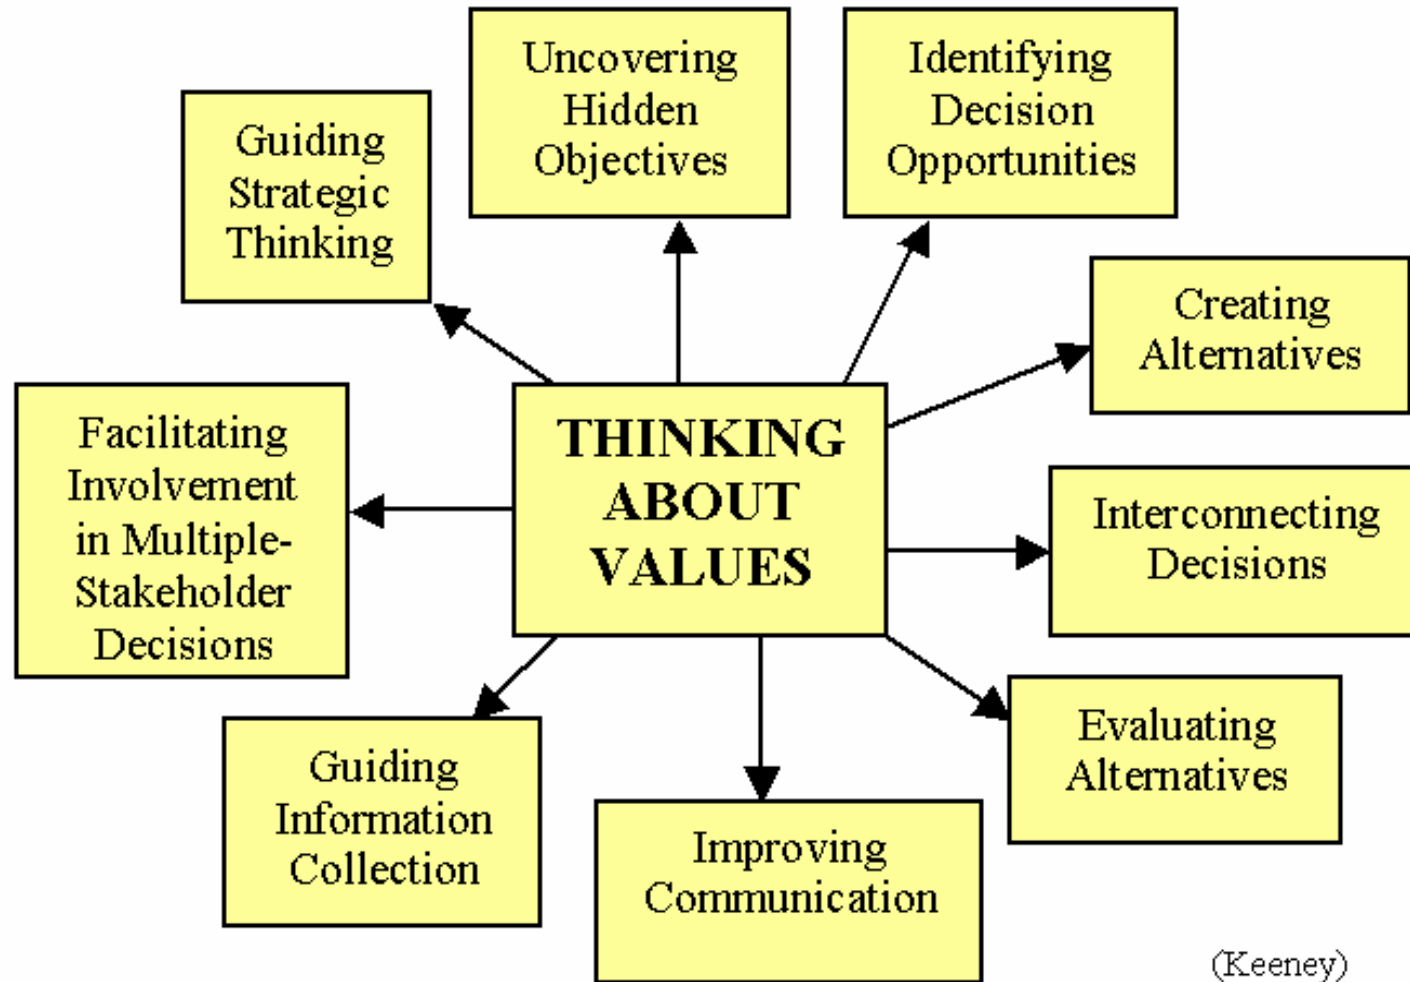

VFT Basics

- **The VFT approach emphasizes values as the driving force behind decisions:**
 - **Evaluates how well alternatives achieve those values**
 - **Allows the incorporation of intangible concepts into the decision-making process**
 - **Provides a defensible process**
 - **Adds some objectivity to a generally subjective process**

Benefits of VFT

10 Steps

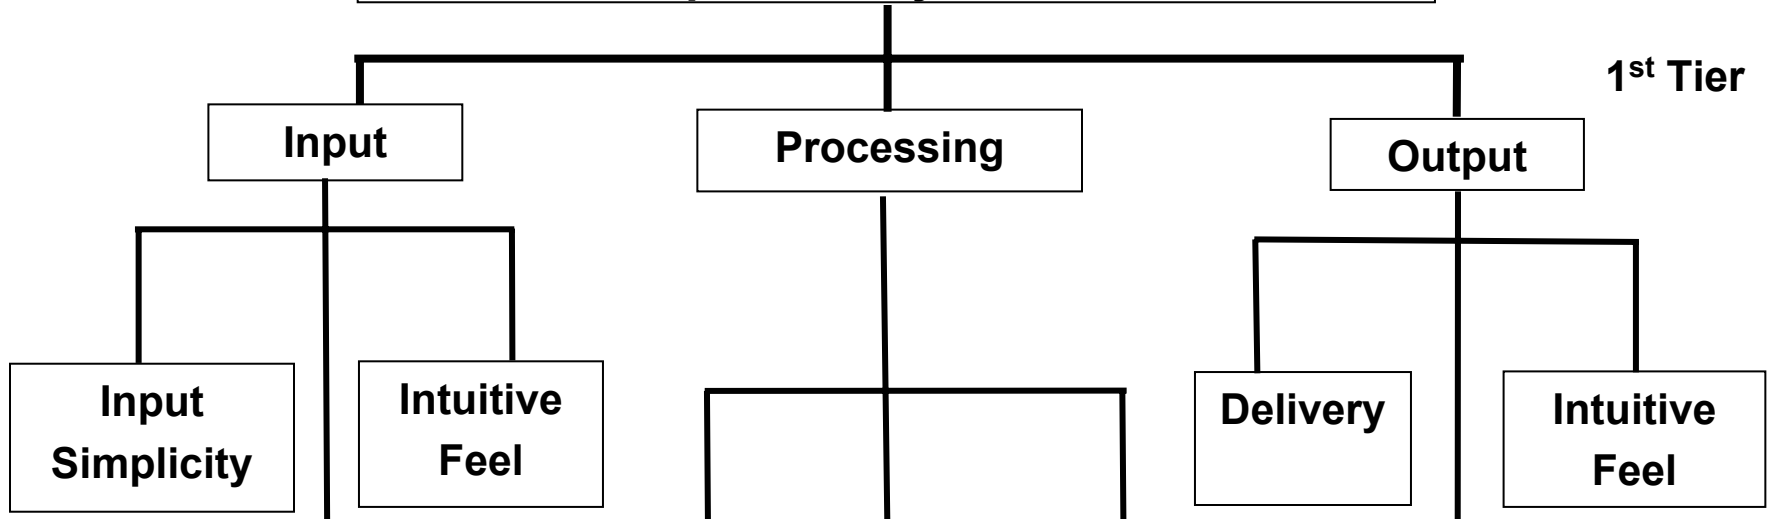

- 1. Define Problem**
- 2. Build Hierarchy**
- 3. Identify Evaluation Measures**
- 4. Establish Evaluation Functions**
- 5. Weighting**
- 6. Choose Alternatives to Evaluate**
- 7. Score Alternatives**
- 8. Deterministic Analysis**
- 9. Sensitivity Analysis**
- 10. Analyze Conclusions**

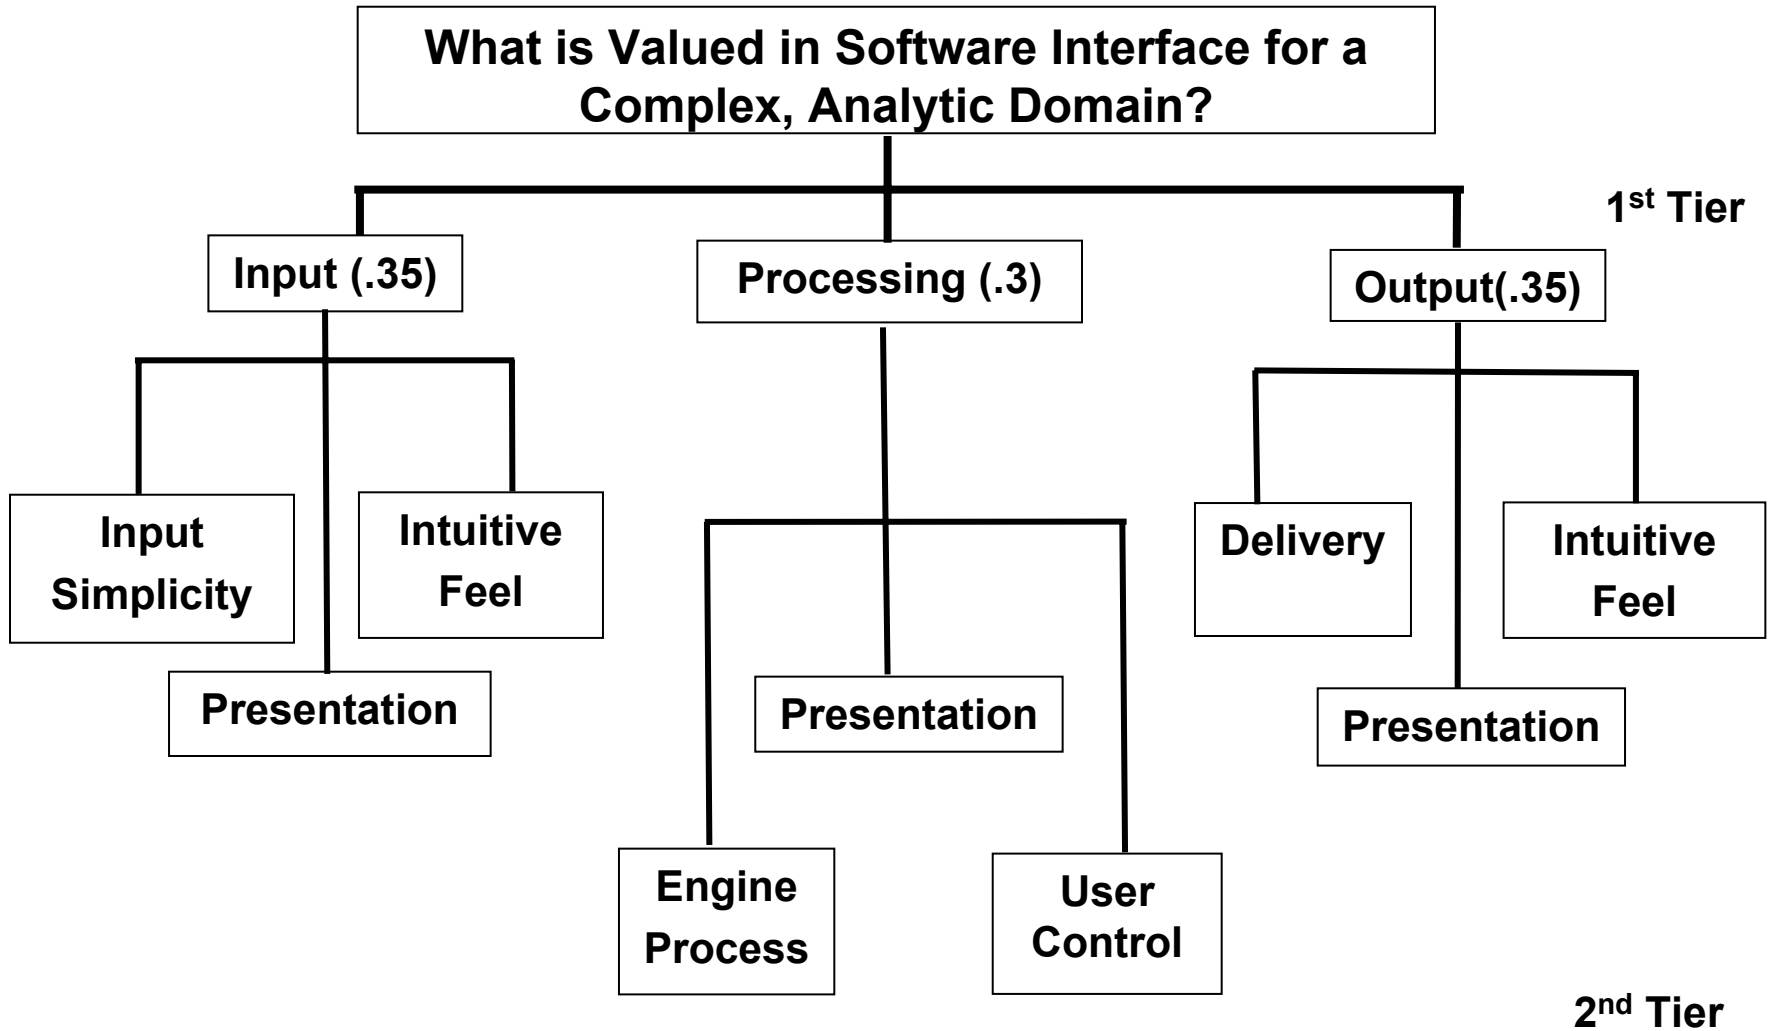

VFT with Intel Analysts

What is Valued in Software Interface for a Complex, Analytic Domain?

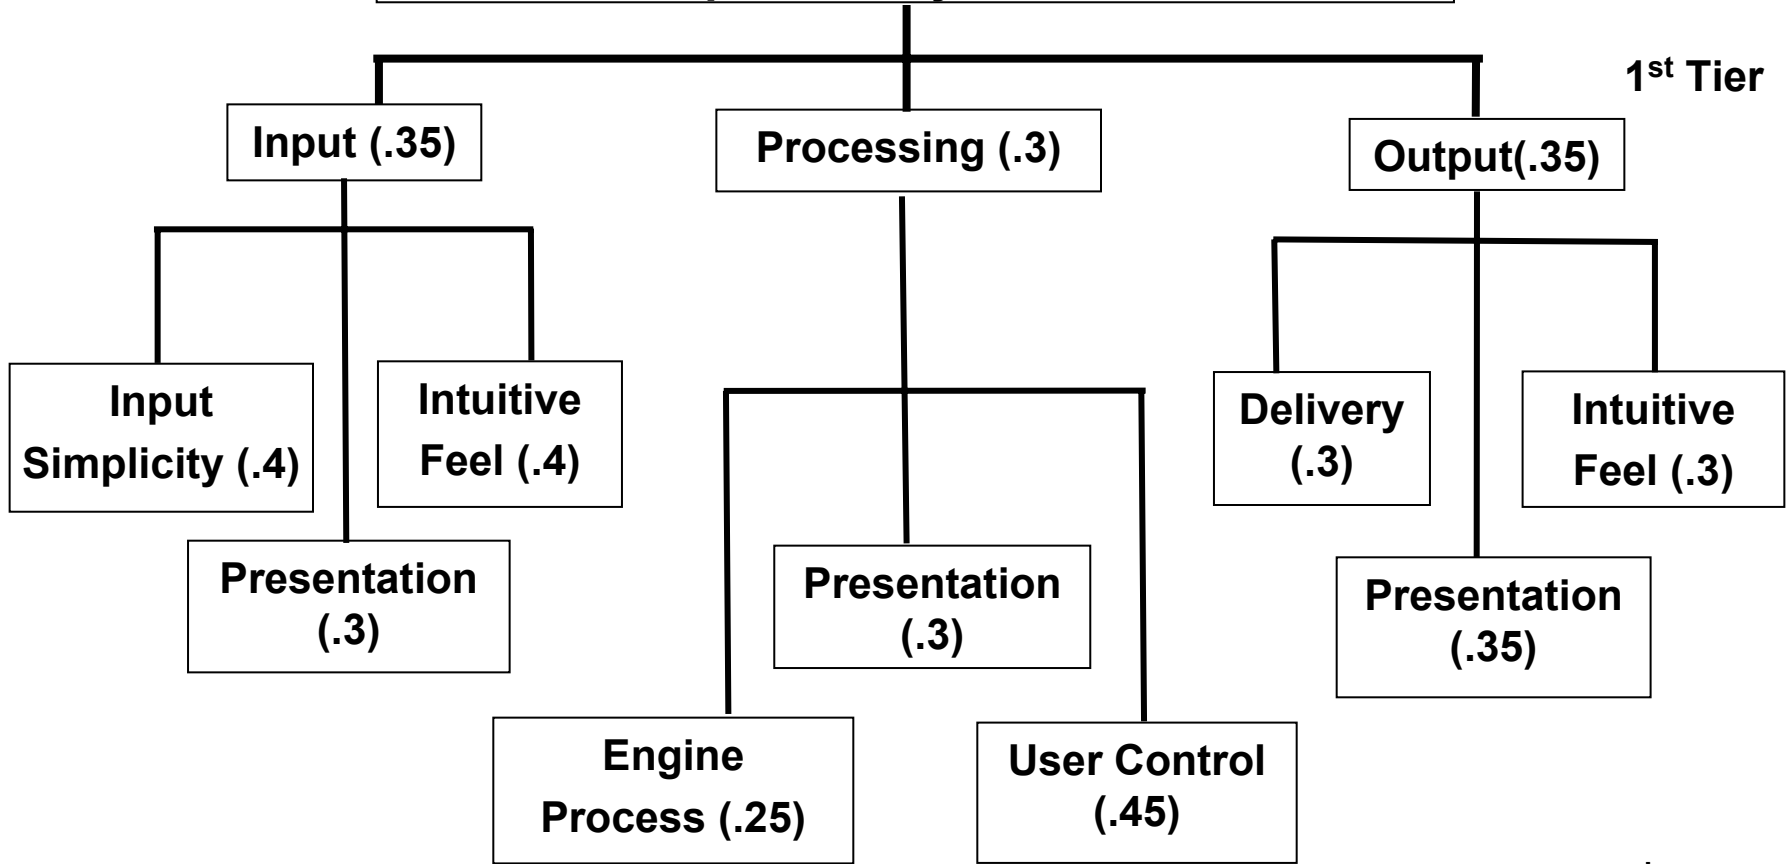

VFT with Intel Analysts

What is Valued in Software Interface for a Complex, Analytic Domain?

2nd Tier

VFT with Intel Analysts

Application to C2

What is important to represent to provide C2 Situational Awareness?

- **Past, current and potential future operational picture**
- **Campaign plan**
 - **Current plan**
 - **Status of plan**
 - **Issues -> Existing and anticipated**
- **Historical data**
 - **Lessons learned, previous campaign Commander's Intent, baseline or previous**
- **Military battlespace**
 - **Logistics, infrastructure, public affairs, comms, weather**
- **Relevant non-military battlespace**
 - **Political, economic, social, information**
- **Temporal, spatial, virtual data**

Application to C2

What is important to represent to provide C2 Situational Awareness?

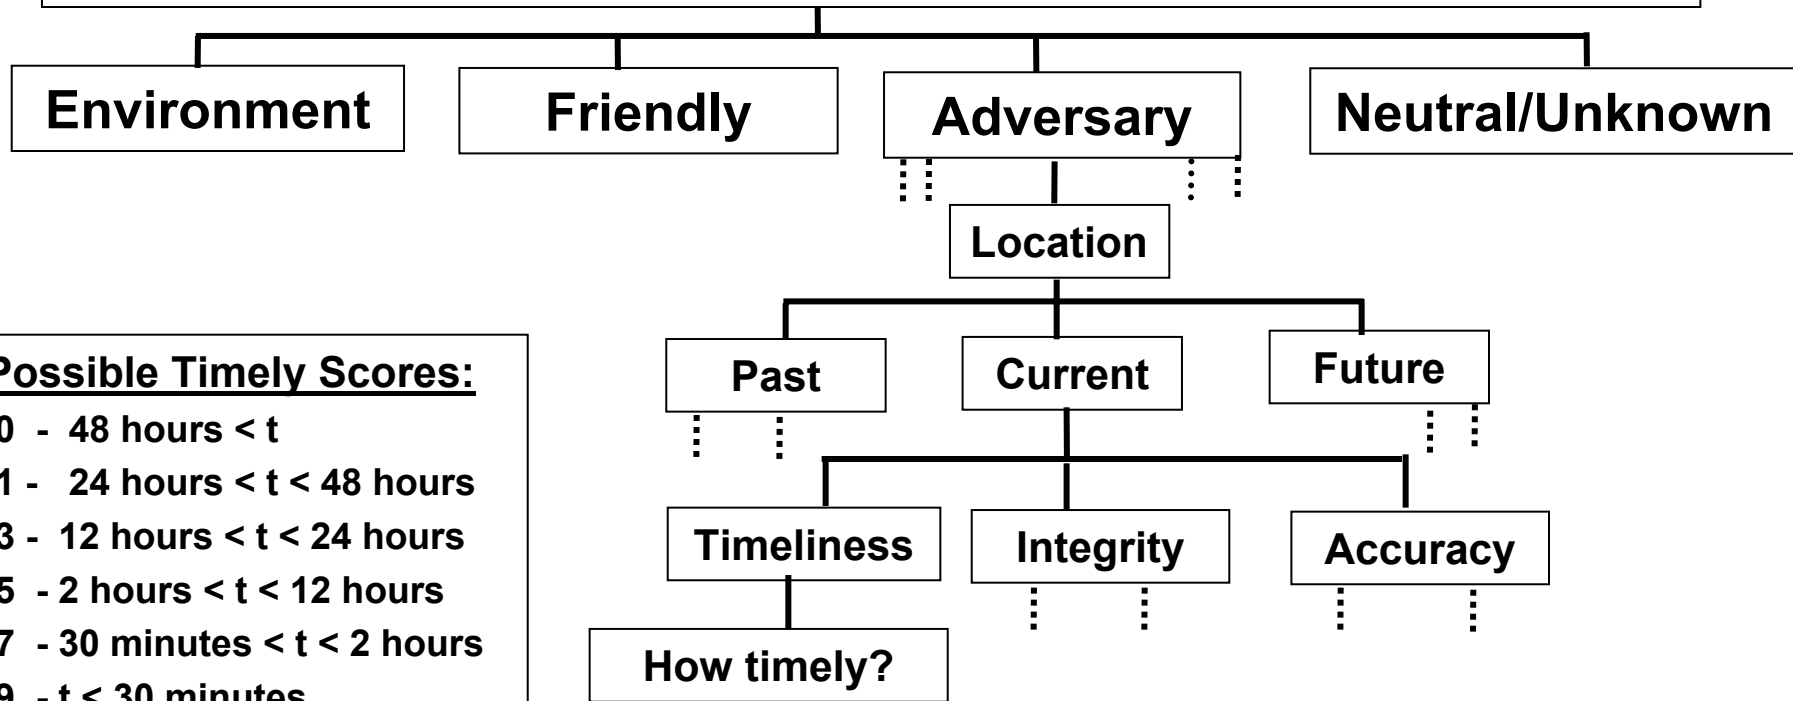

Based on Joint Operational Concept for the Family of Interoperable Operational Pictures

Application to C2

What is important to represent to provide
C2 Situational Awareness?

Possible Timely Scores:

- 0 - 48 hours < t
- .1 - 24 hours < t < 48 hours
- .3 - 12 hours < t < 24 hours
- .5 - 2 hours < t < 12 hours
- .7 - 30 minutes < t < 2 hours
- .9 - t < 30 minutes
- 1 - Real Time

Based on Joint Operational Concept for the Family of Interoperable Operational Pictures

Discussion

- **Usability**
 - The interface capability VFT hierarchy valuable for usability
 - Can be vetted through lower-end users
- **Usefulness**
 - Needs to be vetted through decision makers
 - Based on existing documentation so gives valid starting point
 - Challenge: Merging all relevant input
 - The final C2 VFT Hierarchy will be extensive
 - Complementary to other knowledge elicitation methods
